# DBMS PROJECT SCOPE

## **Project Title:**

Dare 2 Design: Connecting Students and Mentors in the Invention Process

## **Objective:**

Our objective is to create a website for the Dare 2 Design program that will serve as a platform for connecting students in grades 3-12 with experienced mentors and resources to help them create and pitch an original invention at a state-wide convention. The website will provide information on upcoming events, workshops, and training sessions, as well as showcase past projects and connect judges with participants.

## **Scope:**

The website will be designed to serve the following groups:

- Students in grades 3-12 who are interested in participating in the Dare 2 Design program
- Mentors and educators who are interested in supporting student inventors and entrepreneurs
- Judges and organizers of the state-wide convention who need a platform to review and evaluate participant projects

The website will include the following features:

- An overview of the Dare 2 Design program, its mission, and its goals
- A registration form for students to sign up for the program and connect with mentors
- A mentor directory which show mentors intro and work experience
- Information on upcoming events, workshops, and training sessions
- A project showcase where participants can share their inventions and receive feedback from mentors and judges
- A judging system to allow judges to review and evaluate participant projects
- Contact information for the Dare 2 Design team and organizers
- The website will be designed with a clean and modern layout, with easy navigation and user-friendly features to ensure a smooth and engaging user experience for all participants

## **Note:**

Please remember that this project is commercial and client not share back-end complete requirement yet .Now we are working on front-end designing. Thank you
